Ergonomics & Soft-Tissue Injury & COVID-19 Infectious Disease Prevention - Worksite Evaluation & Risk Assessment -

| Services | Description | Price |
|---------------------------------------|---|----------------|
| Worksite Evaluation Regulation | <p>OSHA regulations require every company, at a minimum, to evaluate and assess risk on an annual basis. Risk should also be evaluated when new equipment is installed, a process changes, new risk is introduced into the workplace, and as the result of an injury investigation.</p> <p>COVID-19 has added an additional layer of risk to industrial health and safety, and has influenced other areas of employee health & safety.</p> <p>Currently, Cal/OSHA is requesting funding to mass hire investigators.</p> | |
| Scope of Work | Accurate Ergonomics (AE) will perform a Soft-Tissue Injury and/or COVID-19 Prevention, Worksite Evaluation & Risk Assessment for 1 to 2 Workgroups, plus deliver improvement strategy recommendations. | |
| Pre-Assessment Preparation | <ul style="list-style-type: none"> Analyze the last 3-5 years of soft-tissue injury and/or COVID-19 illness metrics (optional). Provide a Risk Assessment Agenda. Meet with Stakeholders online to review and finalize Risk Assessment Criteria and Agenda. | Included |
| Risk Assessment | <ul style="list-style-type: none"> Perform a Risk Assessment. .5 to 1 day on-site, plus off-site report finalization. | Included |
